

## Titanium 12G Barrels

# Titanium 12G Barrels

This highly reliable 12-Gauge pump shotgun barrel for legacy shotguns is 45% lighter than its steel counterparts. It greatly eases the burden-of-carry and frees-up weight capacity for soldiers, law enforcement. Weight reduction further enhances performance, by increasing the speed, mobility, and ease of target acquisition and target

tracking, as well as enhancing user endurance and related user accuracy.

Barrel-life is doubled and maintenance is minimized, greatly reducing long-term cost of ownership. This cost is further reduced by the combination of proprietary bore hardening, and titanium being naturally impervious-to-corrosion.

Barrel options and sizes are available for replacement in Remington, Mossberg and Benelli shotguns. The model pictured here includes low profile, integrated (3/9/12 position) titanium Tri-Keymod Accessory Mount and muzzle Stand-Off. The Tri-Keymod provides light weight, simple accessory attachment (lights, lasers, sights) directly to the front of the barrel for proper sight alignment vs. poorly skewed forend mounting. The titanium crenelated muzzle Stand-Off is lightest where it matters most at the tip of the gun and it is threaded-on allowing for use of various muzzle attachments.

## FEATURES

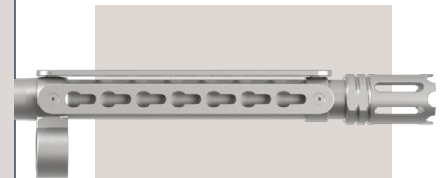

### 45% LIGHTER

- 45% lighter barrel than steel counterpart
- Easier carry & comfort
- More weight-capacity for other items
- Faster target acquisition & tracking
- Increased endurance & related accuracy

### 2X MORE DURABLE

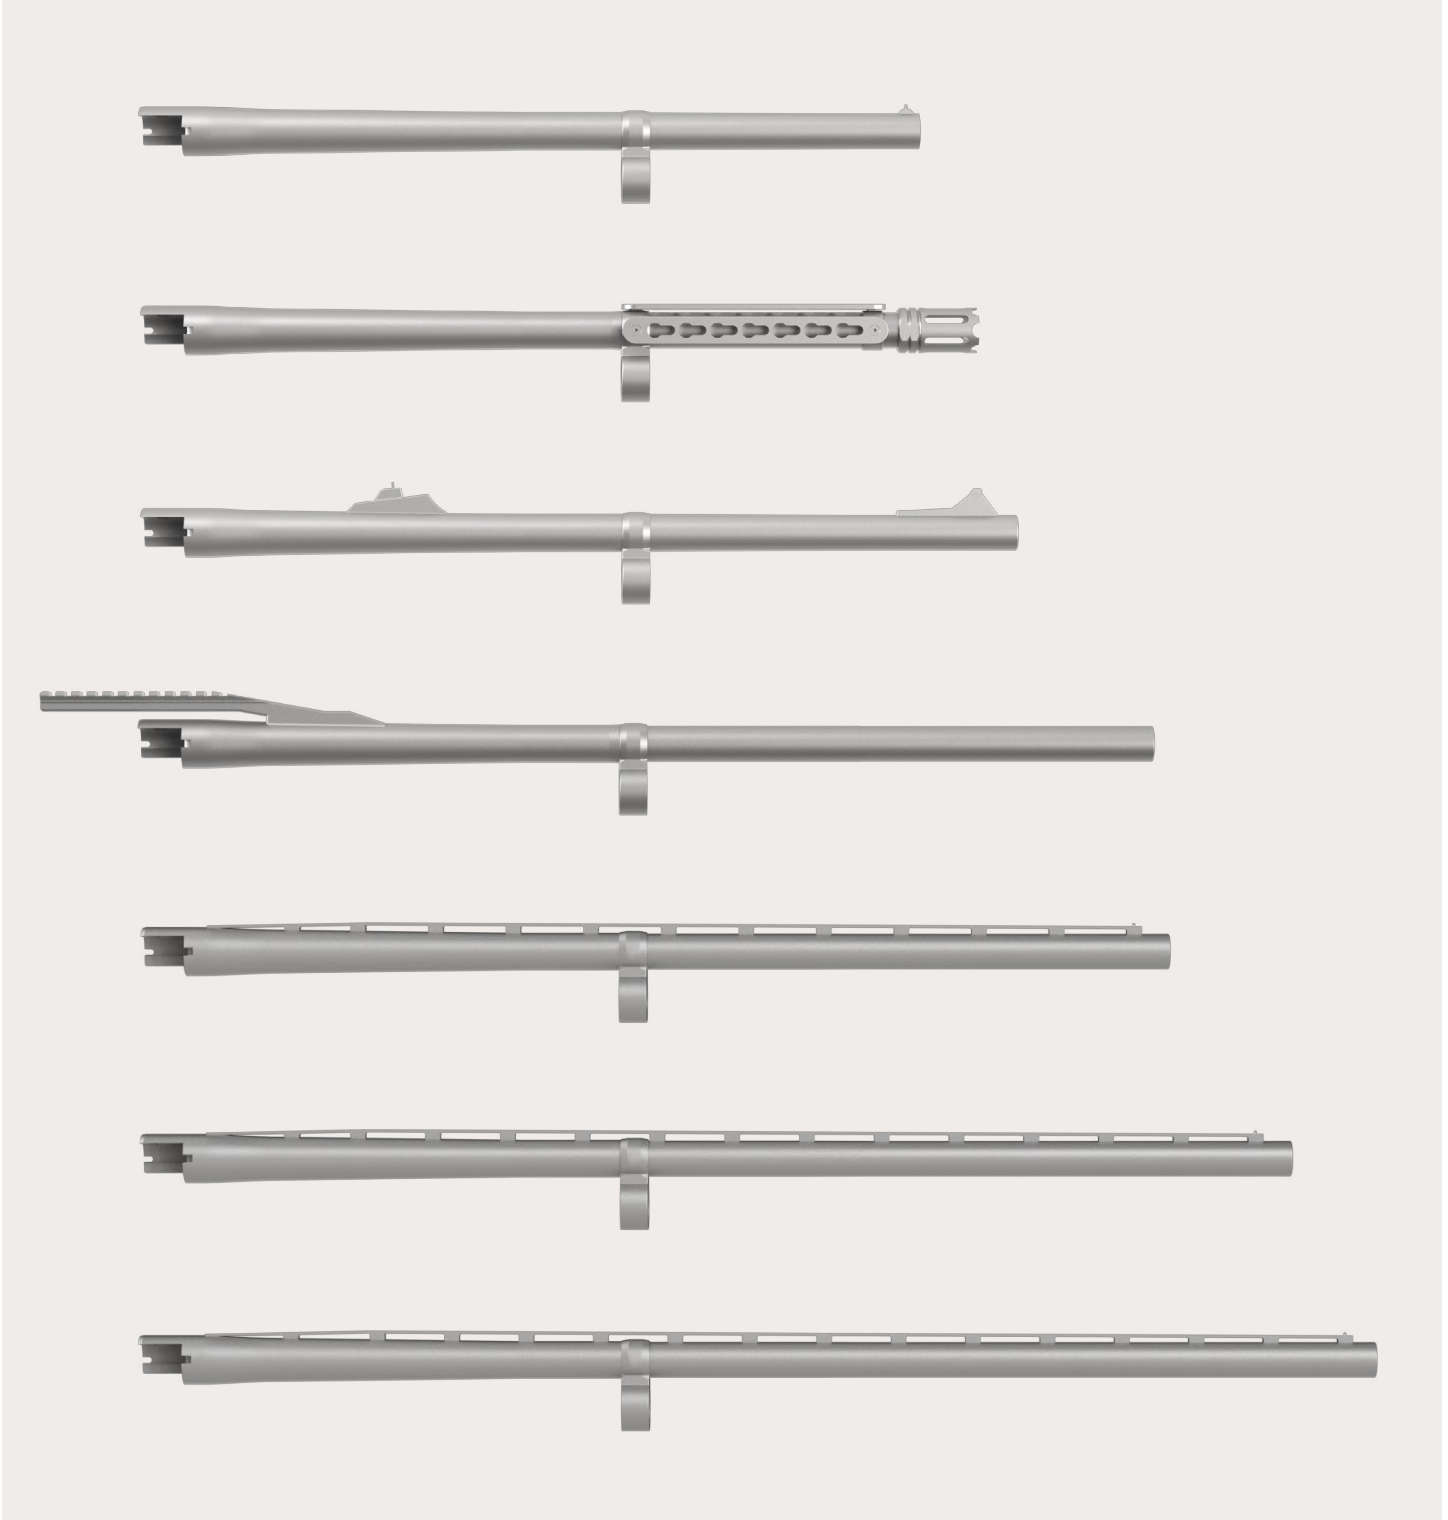

- Proprietary treatments double barrel life and ensure non-binding
- Impervious-to-corrosion
- Minimized care & maintenance
- Various barrel sizes & options available

**45%**  
**LIGHTER**  
THAN STEEL BARRELS

**2X** MORE  
**DURABLE**
